

FIGHT COVID-19 | GET VACCINATED

Date: September 24, 2021
To: All QHS Employees & Medical Staff
From: Dr. Todd Allen, QHS Chief Quality Officer
Subject: COVID-19 Booster Doses

Beginning today, Queen's is administering Pfizer COVID-19 vaccine booster doses for the following groups who have received two (2) doses of the Pfizer BioNTech COVID-19 vaccine series with the last dose having been given 6 months or more ago:

1. **Individuals 65 years or older and/or Long Term Health Care (LTHC) residents**
2. **Individuals 18-64 years old with underlying medical conditions (not limited to the following):**
 - *Cancer
 - *Chronic kidney disease
 - *Chronic lung disease
 - *Substance abuse
 - *Dementia
 - *Diabetes
 - *Heart conditions
 - *Liver disease
 - *Obesity
 - *Sickle cell disease
 - *Smoker (former or current, includes vaping)
 - *Stroke

Click [here](#) for a complete list of underlying medical conditions.

3. **Individuals 18-64 years old who are at an increased risk for COVID-19 exposure and transmission because of an occupational or institutional setting such as:**
 - *Health care workers
 - *Front line employees (ie. grocery store workers or teachers)

For those who choose to get a booster dose and are participating in the QUASAR study, it is recommended that you take the 12-month antibody test BEFORE receiving a booster dose.

FIGHT COVID-19 | GET VACCINATED

Individuals will be asked to attest to the condition or situation they have which makes them eligible for a booster dose. No documentation is needed.

NOTE: Third doses of the Pfizer and Moderna vaccine are still being administered for immunocompromised individuals.
